

Safety

Get total commitment to safety when you partner with **Tri-City Group**

Tri-City Group is dedicated to putting the safety of our employees first and maintaining an accident-free workplace. A successful job means sending all of our employees home safe each and every day. Our commitment is uncompromising, so we do whatever it takes to ensure the right tools are in place to get the job done safely. Through engineering controls, personal protective equipment and proper training, Tri-City Group is able to eliminate hazards and reduce the risk of injury on the job. For Tri-City Group employees, commitment to safety is not just a slogan. It's a way of life.

CONFIDENCE DELIVERED.®

Tri-City Group

Experienced in safety.

At Tri-City Group, our commitment to safety is a top priority and a team effort. Led by our comprehensive team of safety professionals, management takes direct responsibility for employee safety and the quality of our safety programs. Project managers and foremen are accountable for the jobs and the people they supervise. Employees take responsibility for their own safety and the safety of their fellow workers.

Tri-City Group is highly proactive about safety policies and procedures. Our initiatives include correcting potentially unsafe conditions and equipment, identifying and correcting unsafe or incorrect work habits, training all employees to work in a safe manner and pre-planning jobs to comply with safety standards. As a result, Tri-City Group has achieved exceptionally low insurance experience modification rates (EMR) over the last decade – a cost savings we proudly pass along to customers. Incident rates remain well below the national average. Tri-City Group is consistently looking for new ways to lead the industry in safety.

At Tri-City Group, following safety procedures is a condition of employment. We take a no-nonsense approach to safety. We are committed to an injury-free workplace.
