Incentives for Businesses

FEDERAL

There is currently up to a **30% federal tax credit** claimed against the tax liability for commercial and utility investors in solar energy property. (Section 48)

Modified Accelerated Cost Recovery System (MACRS Depreciation)

- The Modified Accelerated Cost Recovery System (MACRS), established in 1986, is a method of depreciation in which a business' investments in certain tangible property are recovered, for tax purposes, over a specified time period through annual deductions.
- Qualifying solar energy equipment is eligible for a cost recovery period of five years.
- The market certainty provided by MACRS has been found to be a significant driver of private investment for the solar industry and other energy industries.

*** Consult with a tax professional on the completion of the proper federal solar energy tax forms.**
